

HOW TO burn an .ISO file using BURNISO 1.03:
(<http://www.paehl.de>)

1° Insert a empty disc on the recorder drive.

2° Download the tool [BurnIso](http://www.paehl.de) that will allow to burn the iso file.
(<http://dpaehl.dd6338.kasserver.com/cdr/burniso.php>).

3° Uncompress the content of the zip file that you have just downloaded to a new folder. Inside the folder you'll find four files, one of them called Burniso, run this one.

4° Main information screen should now show this information, telling us that the cd drive is ready and waiting for burn.

Medium in drive is CD-R Disc is empty
Compl: size: 703,12 MB
Used size: 0,00 MB

5° Push **Open** and a file explorer will let you select the iso file from your hard drive.

6° Now you just have to push the **Burn** button and wait until the 100% is reached.
